Professional Summary

I am experienced Java programmer. I have about 6 years of experience in professional programming. I am interested in software architecture and this is the direction which I want to develop myself. I would like to extend my knowledge about Domain Driven Design, especially usage this technique in real project.

Experience

since July 2017 — **Sollers Consulting Sp. z o.o.**
st Koszykowa 54, Warszawa
Senior Developer
Business processes implementation on Guidewire suite for customers around the world. IntelliJ Sonar plugin customization for support of Gosu language.

since March 2015 — **Koło Naukowe Programistów Java**
st Koszykowa 86, Warszawa
President, Mentor
Managing of science club and managing of mentors team. Programming lectures and workshops organization. Teaching students programming in Java on various levels (basic, advanced).

June 2014-July 2017 — **Innotion Sp. z o.o.**
st Łucka 2/4/6, Warszawa
Developer
- Benefit service system (Java, PostgreSQL, Ext.JS, internal Innotion framework)
  Employee selects benefits (ie. multisport card, lunch card and other) within the budget allocated by the employer.
  In this system we used Postgres schemas, it allowed us to separate customers data in the same database.
- CRM system (Java, PostgreSQL, Ext.JS, internal Innotion framework) System for handling sales and customer relations. There was integration with internal customer QAD class system.

Education

since 2014 — **Polish-Japanese Academy of Information Technology**
Koszykowa 86, Warszawa
Field of study: Computer Science
Specialization: Programowanie Aplikacji Biznesowych

2011-2014 — **University of Cardinal Stefan Wyszyński**
Wóycickiego 1/3, Warszawa
Field of study: Computer Science
